PRICE TWO CENTS

COUNCIL RE-AFFIRMS ITS STAND REGARDING HAZING AND ENFORCEMENT OF RULES

Special Meeting Called Yesterday — Resolution Drawn Up—Enforcement of Freshman Rules Favored—Parades Down Town Will Not be Approved Unless Permission for Such is Granted — Science Sophomores Called Upon to Explain Recent Demonstrations

The Student's Council reaffirmed its stand on the question of hazing, at a special meeting held yesterday afternoon, in the following resolution:

"Resolved that the Students' Council of McGill University approves of the enforcement of the freshman rules. Nevertheless the Council insists that in the necessity of imposition of penalties, these be imposed within the college grounds and without danger of personal injuries."

Opinion was unanimous that the freshman rules should be enforced, but it was stressed that parades to downtown districts would not be approved or tolerated unless permission for carrying out such demonstrations were previously granted by the Council. The point was brought up that in order to avoid interference from police those intending to indulge in parades must obtain permission from the police. All bona fide parades are so protected by the Council.

In view of recent demonstrations carried out by the Science sophomores in connection with enforcement of freshman rules, the executive of that year was called before the meeting to

give an explanation. The following letter submitted for publication summarizes the explanation offered by the Science men to the Council:

To the Student's Council
McGill University.

Dear Sirs—Due to our actions of recent date in regard to enforcement of freshman rules which have been disregarded, there has been a great deal of discussion and comment both in the University and also among the outside public. Upon this matter we would like to make our position clear to the Council and all who may be interested.

Concerning the meeting which we had with the Council this afternoon upon (1) the question of holding a parade in the downtown section and (2) not using discretion in enforcing the rules in the case of a particular freshman. Due to a misunderstanding regarding these matters we see that we have overstepped our limits in these particular cases, and regret our action.

Nevertheless we are given to understand (Continue on Page Two)

INTERMEDIATE AND JUNIOR TEAMS WON

Juniors Won Opener by 24-2

GAMES ONE-SIDED

McGill Second Team Defeated Montreal Firsts by 25-0

The first and second teams representing University of Montreal were defeated by the Intermediates and Juniors yesterday afternoon in the two scheduled games. The Junior game which was the opener went to the Juniors, who disposed of their rivals to the tune of 24-2. The East End second team put a good fight but were out-classed in all branches of the game. The plays which the Juniors pulled off completely fooled the French squad and the Red and White squad made yards practically at will. However, the French students never let up till the final whistle blew and gamely tried their hardest to keep the score down. The game was one-sided at all times and at no time during the game was there any doubt as to the outcome. The French team must be given credit for the way in which they continued playing, and not once letting up, though they saw the score piling up on them. To pick a star on the Juniors would be difficult as every man on the team played a great game. The men whose work showed up the best were McKay and Hume. Both were credited with making two touchdowns and McKay converted three of the four touchdowns. McKays played a good game in the kicking and also in running and was responsible for McGill's other point when he kicked a rouge. The East-enders' two points were made when Mathieu, their half kicked for two rouges.

The teams lined up as follows:—

McGILL	U. of M.
Snap.	
Gilmour	Laurenalis
Kane	Inside
Mellon	Inside
Puddicombe	Laferon
Yule	Middle
P. Cowan	Loranger
Gore	Middle
Bazin	Outside
Taggart	Outside
McKay	Quarter.
Russell	Quarter.
Hume	Harwood
Officials. Hanna and Manson.	

In the second game the Intermediates had as little difficulty in disposing of the Montreal first team and piled up a 25 to 0 score. The Intermediates were in fine form and would have given a good battle to any team and as the Eastenders seemed to be rather doubtful as to what they were to do, it was an easy victory for the Red and White team. The French students were eager enough, in fact at times their eagerness proved costly for on several occasions they were penalized for off-sides, the line running forward before the ball had been snapped. However, as play continued they improved and pulled off some good work during the game. Gendron, who did the kicking turned in a nice game and also did some fine end running. He is a fast man and has had some experience in football before and was easily the best on the Montreal team. The French students' line was not up to standard and consequently the Intermediates had no difficulty in making yards. On one occasion, Spears the McGill Middle, dashed through on a buck and ran forty yards before he was stopped by the Montreal back-field.

Gendron, the kicking half back was the star for the French team, and turned in a very good game. Arnold made the first touch for McGill shortly after the game began which was not converted. Gorré then kicked for two rouges in succession although the Montreal half back was doing some nice kicking. Birkett went over for the second touch and this time it was converted. Blair was responsible for the third touch which was also converted. Gorré and Addey engineered a nice end run that went for the fourth touch of the game. It was a pretty play and brought down heavy applause from the

RECENT COUNCIL APPOINTMENTS.

Stanley E. Read, president of the "Daily," at a recent meeting of the Students' Council, was appointed vice-president of the Council.

J. G. Senecal, of fifth year Medicine, was appointed by the Council as their representative at the "burying of the Tam," a parade which is being held by the University of Montreal on Saturday, October 18th.

McGILL GRADS. HOLD ANNUAL CONVENTION

Dr. A. T. Bazin Elected President for Coming Year

BRANCHES ACTIVE
Endowment Fund Started and Directory Published This Year

The McGill Graduates' Society held its annual meeting on Tuesday night at the Engineering Institute of Canada, 176 Mansfield Street. It was announced that the total subscriptions to date for the McGill Graduates' Endowment Fund had reached \$10,999.32. Mr. W. D. MacLennan, the secretary read the report on the Society's activities for the year ending September 30th. It was stated that through the medium of the Society's office, circulars had been sent to all the graduates, in connection with this Fund. It is a notable fact that although the subscriptions only started during the past year, the amount mentioned above has already been collected.

A feature of this campaign was that the secretaries of the various years personally signed letters which were forwarded to the members of their particular classes. These follow-up letters carried an appeal somewhat different from that contained in the standard circulars and were undoubtedly an important item in getting the Fund so well started.

What is probably the outstanding event of the Society's activities during the past year is the publication of the Directory. This interesting book contains the name and address of every McGill graduate, besides an alphabetical list of names, the different classes in the various Faculties are also shown. A geographical list is contained in the back of the book which shows "that McGill Graduates are to be found in all quarters of the globe."

The cost of the Directory was \$2,764.47, half of which was borne by the University and half by the Society. However, the cost to the Society has been reduced to about \$1,000.00, as between 400 and 500 copies have already been sold, and will become less as the sales increase.

The edition published in 1913 contained 881 pages, whereas the present one required 556 pages.

(Continued on page three)

fifty spectators who slept in the stands Gorré converted it and a few moments later the game ended. The game consisted of four eight minute quarters instead of the regulation hour period, because the game was late in starting and the seniors were ready to go on to practice. During the game Dansereau, the big inside had the misfortune to dislocate his elbow. However the member was set in place immediately by the doctor attending, though it will probably keep him out of the game for a good while.

The teams lined up as follows:—

McGILL	U. of M.

"PIERRE" AND BURLAND AT UNION TO-DAY

First "Jazz Tea" of Season This Afternoon

ONE OF MANY

Bobbie Burland's Orchestra Will Play One Hour

The social season of McGill University opens at quarter to five o'clock this afternoon at the Union, when the first "Jazz-tea" of the season will be held. Bobby Burland's orchestra, which performed at several similar functions last year, has been secured for the occasion and will provide a full hour's entertainment. The orchestra has been practicing the latest hits for the past few days, and is ready to give those who attend a real hour's enjoyment.

This "Jazz-tea" is the first of a series that will be run off throughout the season. "That Jazz-tea" are popular with the students body was proved on more than one occasion last year. Everytime a Jazz-tea was in progress, it was practically impossible to obtain a seat in the cafeteria. This year we expect them to prove equally popular, said a member of the Union House Committee to the "Daily" yesterday.

Pierre will be on hand, and has ordered an extra supply of pastry for the event. The tea and coffee will be just the right temperature, and there will be malted milk and cold aerated waters for those who prefer these forms of beverage. There will be cakes to suit a variety of tastes and sandwiches as well.

Bobbie Burland's Music Makers have secured some of the latest music and will play in addition, many of the old Union favorites. The orchestra consists of piano, horn, saxophone, banjo, violin, drums and traps.

Arrangements have been made to accommodate capacity crowd, but the management has issued a notice to the effect that no seats would be guaranteed after half past four.

WATER POLO GAME TO-NIGHT AT Y.M.C.A.

Intermediates Meet Y.M.C.A. in First City League Game

The water polo season gets away to a start to-night when the Intermediate team stacks up against the Central Y. M. C. A. outfit in the tank of the latter 8.15. This game is one of the regular City League games, and as the Senior team is not playing, the Intermediates are the only group representing McGill.

The team this year is exceptionally strong and is conceded to have a good chance of cleaning up. Parsons who was out of college last year is back again and putting up a stellar game. Muds is another man who has played here two years ago. Moore played Intermediate Polo last year and was a substitute for the senior team in several games. He plays a hard game and checks well. George Vickerson is back again this year and is playing a great game. He was captain of last year's Intermediates and was high scorer on the team. Williams who was out of the game last year is back between the posts and it will be a good shot indeed that gets by the wary veteran. McLaren who was out last year will be in the line-up and should give a good account of himself. Adams, a new man is showing up well and will be out as substitute to-night.

New material is greatly encouraged and any men who have played water polo should come out to the K. of C. tank for practice.

The team would appreciate the support of a few rooters to-night and anyone with an evening off would do well to drop around to the Y. M. C. A.

The following will make up the team to-night: Moore, Parsons, Moore, Vickerson, Williams, McLaren, Adams.

A Freshman who lived down in Foulke. One morning was rudely awoken by the slap of wet towels.

SEMI-ANNUAL MASS MEETING YESTERDAY

Ball-room of Union Well Filled

FINANCES GOOD

Business Discussion General and Brief

One of the best financial reports ever given by the Students Council was read by the Secretary Mr. Fletcher, yesterday at the semi-annual meeting of the Students Society. The detailed account, which has already been published in the Daily was not gone over but president, McLean said that the Council have now on hand a balance of about ten thousand dollars. This is an improvement over previous years. The president went on to add that the University will invest five thousand dollars of this in trust for the Council.

The matter was brought up about the recent tennis tournament. It was wanted to be known why a twenty-five cent charge was made instead of accepting the regular tickets published in the handbook. This matter was referred to the Athletic Board and the explanation made that the twenty-five cents were charged for a reserved seat and that the ticket was for general admission only.

Mr. McLean said that in reference to the hand-book the Council would be pleased to receive suggestions from any student for improvements in next year's hand-book. He also mentioned that the hand-book is self-supporting; that is its expenses are covered by the revenue derived from the advertisements.

The question was asked if there was any College Orchestra. The president replied that there was not at present any orchestra but that if a success was made of the Rooters Band a movement would be started to develop a College Orchestra with regard to the directory it was stated that the Council are working on that at the present time. Mr. McLean again asked in conjunction with the directory that the names, addresses and telephone numbers of the executive of all classes be handed in at once to the Council.

The President also announced that reports of the meetings of the Council would be published in the Daily this year in order that the student body might be conversant with the business of the Council. At the last meeting of the Council, Stan Read, President of the Daily, was appointed vice-president of the Council.

Mr. McLean said that this year the Students Council had taken a definite stand on the subject of hazing freshmen.

Hazing was to be done away with and a few simple regulations be laid down. These regulations must be obeyed and the Council had given the Sophomores control of enforcing these within certain limits providing nothing is done to lower the prestige of the University in the sight of the citizens of Montreal.

A fairly large number of students attended the meeting, which was quite short, lasting only about half a hour. The discussion was, for the most part general.

Maud (newly married)—You look very melancholy. George are you sorry you married me?

George—No, dear, of course not. I was only thinking of all the nice girls I can't marry.

Maud—Oh, George, how horrid of you! I thought you cared for nobody but me.

George—That is so, my dear I wasn't thinking of myself, but of the disappointment they have had!

SPEND YOUR PENNIES AND GET YOUR PHOTO IN PAPER SAYS EDITOR

"Spend your money and make your votes count heavy for the Round-Up Beauty Section," urges Ben H. Williams, editor the Round-Up, New Mexico State University.

If a student has his picture made before November 1, each penny that is spent on the pictures will count five votes. That is, if one spends \$5 for his pictures before this date he will have 2500 votes to cast for his choices in the beauty section.

Each penny spent before November 15, counts four votes, that spent before December 1 allows three votes per cent; and if pictures are made between December 1 and December 5 the person will be allowed two votes for each cent.

The same system will be used in Round-Up sales. Money spent for the annual will give the buyer votes at the rate allowed on the photographs, and according to the same dates.

10,000 Votes
Ten thousand votes puts a girl on ballot for one of the eight pages in the beauty section.

SCIENCE DEFEATS ARTS IN RUGBY

Victor's Good Kicking and Defence Give 5-1 Win

Yesterday afternoon the Science football squad forced a 5-1 defeat down the throats of the Arts Inter-faculty representatives. The affair was won by extensive kicking, which Howard Hymen performed with effect at the crucial moments. The Science linemen gave him a strong support by a stonewall defense which the Arts men found difficult to penetrate. The engineering outfit were much stronger on the kick formations than they were on the running plays. Arts produced the best ball carrier in the person of Clayton Bourne, who on several occasions wormed his way through the enemy defense for substantial gains. Bill Gardener, another Arts student, ran Hymen a close second in kicking honours, and in addition showed a hardy fighting spirit all the way through the fray.

At the very outset of the game, the Science team showed their superiority, working their plays with a smoothness and dispatch lacking to be able to score the first point with their rivals. They made steady progress down the field till Hymen was well placed kick. Arts chalked up a point, evening the score some minutes later. From that point till the final whistle, play seersawed up and down the field. In the last period and a half, Science found themselves frequently within easy kicking distance of the Arts line, and with the resulting tally the victory was secured.

INTERNATIONAL RADIO CHESS IS THE LATEST

New York, Oct. 15 (By "The New Student") — The first international intercollegiate radio chess match will be played by Haverford and Oxford late in November. American colleges have contested several times by means of radio, but this will be the opening battle between an American and an English college.

Two stations will transmit the moves on each side of the Atlantic. All work is being done by amateurs. G-2NM and G-2SZ will operate from England on wave lengths of 80 and 120 meters. 3-BVN, the Haverford College station, and 3-OT, the private station of a Haverford Sophomore located at Ambler, Pa., will transmit the American moves on a reserved wave length of 120 meters.

The game will be a test of long-distance, short wave length amateur transmission as well as a contest between rival chess players.

FRESHETTES VOTED GREEN CAPS TO BE WORN AT COLORADO

Fresh women of Rocky Mountain College, Fort Collins, Colorado, showed their spirit by voting to wear green caps. The style is new to the present student, but was used years ago, thus scoring a point for Aristotle's theory that "there is nothing new under the sun."

At least, however, the variety is new as there are caps worn which might be those adorning the shaven head of a convict; the Harry Laiter style, minus only the kits; the "Little Willie" type, with its chin ribbons; and that indescribable style which might

represent a green and gold bark riding upon Marcel Waves until it became dizzy.

And so it goes, the latest being that these people who are too dignified to wear "em will be tubed—guaranteed to wash away all semblance of dignity —"from those who have not, shall be taken away even that which she has," as the Frosh bible says.

The town merchants look eagerly forward to that time when these ingenious women called freshmen may have a brand new, shiny and profitable idea.

MONTREAL, THURSDAY, OCTOBER 16, 1924.

THE FINANCIAL STATEMENT.

In the applause which greeted the announcement yesterday of the comfortable surplus fund in the students' treasury, one reads the legitimate elation of the student body that such a condition should exist, and an expression of approbation and thanks to those who last year were responsible for the disposition of student funds and who to a greater or lesser degree made possible the addition of nearly two thousand dollars to the bank balance.

To the popular axiom that "money is the root of all evil," may be added the corollary that its manipulation by elected bodies holding it in trust, is the source of most of the bitter contentions which arises in corporate or associated management. Deficits are not pleasant to contemplate, and yet it is not uncommon for the electorate once having chosen a responsible managing body, to thoughtlessly strew its path with multiple requests for non-essentials, moreover, we are often unappreciative of the changed business conditions which dictate a deviation from projected improvements or the abandonment of proposed expenditures calculated to add to the sum total of our happiness. We say this with no intention of vindicating any misguided practice, but to emphasize the assertion that financial statements are not unmistaken indices of the efforts expended by a directorate.

If any benefit is to be derived from the yearly publication of financial statements, it must be that which will result in a readjustment of finances so that societies will be made self-supporting, that surpluses may be utilized not in offsetting a series of more or less serious deficits, but may make for greater stability and expansion.

The cafeteria, working under a slightly higher overhead resulting from an admittedly superior service, did not make operating expenses. We have the remedy in our hands: increased patronage, individual and collective. There was a decrease last year in revenue derived from banquets, which has no reason d'être. Billiards, too, suffered a decrease, which lovers of the game can remedy by favoring their own club.

The deficit resulting from the promotion of the Alma Mater Dance we can attribute to the ever-present, though questionable desire to outstep our predecessors. The item of decorations alone trebled in cost that of the previous year, and contributed to offset the increase in receipts.

On the whole, however, the financial statement reflects a sane management, and we should be remiss did we not add our appreciation of the services of the various directorates

THE TENNIS TOURNAMENT.

For the first time in three years the annual Intercollegiate Tennis Tournament will be held at McGill. This extremely scientific sport has for a long time been one of the outstanding ones of McGill, and is one from which she has derived no small measure of honour. For two years past, two of her players have represented Canada on the Davis Cup Team, and have fought for the cup which is presented only to the best in the tennis world. In addition to this distinction, McGill teams for the last four years have won the Intercollegiate Championship, in itself no small achievement.

This morning the first of this year's matches will be played, and any lover of tennis will find the contest replete with thrills. Tennis is a game that calls into play all the muscles of the body, and an active co-ordination of eye, hand and brain. In today's tournament the spectators will be treated to the best that Canada has to offer in this type of sport. Even the layman will find it extremely interesting to watch the display of endurance and skill that these tournaments require. To the scientifically interested they will offer an opportunity of observing the different strokes, serves, styles of play, and all the little detail with which the casual onlooker is unfamiliar. More important, however, is the fact that the red and white colours are being carried into one of the battles of inter-university competition, and we know that win or lose, nothing will happen that will bring dishonour to the university's name.

COUNCIL REAFFIRMS ITS STAND.

(Continued from page one)
stand that the Council heartily approves and will back us up in the enforcement of freshman rules, which we fully intend to carry out, provided that the penalties enacted take place within the college grounds and do not entail danger of serious injury to the offenders.

Married men admire beautiful clothes only when worn by some one less wife or sweetheart. —N. Y. U. Daily News.

CELEBRATE ANNUAL "PAY DAY" AT HOOD U.

New York, Oct. 15 (By "The New Student") — Undergraduate due-and-bill collectors will envy their fellow officers at Hood College and at other institutions which also celebrate an "Annual Pay Day."

During the twenty-four hours set aside for the occasion everybody in College settles all debts and starts the year with a clean slate. Usually one central point is set aside where all may meet for the purpose.

Ted: "There is only one draw back to my girl."
Red: "What is that, old lady?"
Ted: "She draws back her head from my shoulder."

SENIOR RUGBYISTS GET HARD WORKOUT

Great Fight Expected at the R.M.C. and Queen's Games

After the Intermediate Montreal-McGill game at the Stadium, Coach Shaughnessy put the Senior squad through a two hours practice. There were about twenty five men on hand and after putting them to a fifty yard run the coach divided them up into two squads. The men were put through a signal practice for about an hour, and then the coach sent the two teams against each other. They worked at scrimmage plays until long after dark and the two searchlights were again used.

The squad are all in good shape after Saturday's fray and are practicing hard for the R. M. C. game on next Saturday. Although it is generally believed that the cadets' game is not up to the Intercollegiate standard, the Coach is taking no chances and is working the men hard for this game. The cadets have a good outfit. This year and may spring a surprise that the squad is not prepared for. However, the main point in view is the Queens' game, a week later, and it is in preparation for this game that the coach is working. The Queen's outfit are as strong as the team that last year won the Championship of Canada and will take a lot of beating. However, the team is doing better than ever and should give both the R. M. C. and the Kingston squad a great battle.

ELECTRICAL CLUB TO MEET TO-NIGHT

Officers to be Elected and This Year's Plans Discussed

The first meeting of the Electrical Club will be held at 5.15 to-night in room 53 of the Engineering Building. Those wishing to join are advised that membership is restricted to students of the third and fourth years Electrical courses. A review of last year's activities is given below to give an idea of the years work.

Several visits were paid to electrical plants and shops in the city and the machinery and processes involved were explained by the engineers in charge. About Christmas time a more ambitious tour was undertaken, around the power house plants in Ottawa and district. The trip was carried out very comfortably in a special Pullman provided through the kindness of Dr. Herdt.

Meetings were held throughout the year once a week at which papers on various electrical topics were read by the student members and discussions were held. The year was brought to a successful close with a banquet held at the Queen's Hotel, when members of the Faculty and Students heard Mr. Julian C. Smith, managing director of the Shawinigan Water and Power Company, in an excellent talk on the La Gabelle Power Development illustrated by motion pictures.

It is hoped to have this year's activities even more successful than those given above. To elect a suitable executive everyone interested in asked to attend the meeting.

DEAN H. M. MACKAY ATTENDS CENTENARY

Dr. H. M. Mackay, Dean of the Faculty of Applied Science, was among the delegates from many American and European points to attend the recent Centenary celebrations of the Hensseler Polytechnic Institute.

Representatives to this, the oldest Engineering Institute in the English speaking world, were present from the foremost American societies of engineers, from the Institute of Civil Engineers of Great Britain, and from the engineering societies of French and Italian centres.

TESTING THE EINSTEIN RELATIVITY THEORY

New York, Oct. 15. (By "The New Student")—Two weeks will be needed by Professors Albert A. Michelson and Henry G. Gale, of the University of Chicago, to test the Einstein theory of relativity by means of their elaborate apparatus which is nearing completion at Clearing, Ill.

On October 17 they will begin observations. The apparatus consists of a rectangle of water pipe 1,800 feet long by 1,500 feet wide; an arc light which will flash two beams of light around the pipe in opposite directions, sets of mirrors to relay the light beams around the pipe, and an air pump to create a vacuum in the pipe.

According to the Einstein Theory of relativity, one beam should travel around the circuit in slightly less time than the other.

Many a young newlywed wishes that he had listened to his mother. —N. Y. U. Daily News.

NOTICES

INTERFACULTY RUGBY

Students wishing to participate in the above are reminded that it is necessary to be physically examined. Dr. Harvey will be at Molson Hall on Friday from 12 to 1 p.m.

INTERFACULTY FOOTBALL.

Fifteen games in all have been arranged, and the schedule is as follows:
Arts vs. Sci.—Wednesday, Oct. 15.
Comm. vs. Dent.—Friday, Oct. 17.
Med. vs. Sci.—Monday, Oct. 20.
Arts vs. Dent.—Wednesday, Oct. 23.
Comm. vs. Law.—Friday, Oct. 24.
Med. vs. Dent.—Monday, Oct. 27.
Arts vs. Comm.—Wednesday, Oct. 29.

Law vs. Sci.—Friday, Oct. 31.
Med. vs. Arts.—Monday, Nov. 3.
Comm. vs. Sci.—Wednesday, Nov. 5.

Law vs. Dent.—Friday, Nov. 7.
Med. vs. Comm.—Wednesday, Nov. 12.

Arts vs. Law.—Friday, Nov. 14.
Sci. vs. Dent.—Monday, Nov. 17.
As the last game comes at late as Nov. 17th, all the games must be played on their respective dates — rain or shine, and must all start at 3 p.m. sharp.

Campbell Cope, the senior manager, will supply the referees.

FRESHMEN RECEPTION.

This great event takes place on Friday next, the 17th. All freshmen of all faculties are cordially invited to attend this function. On this occasion a truce is called and freshmen are free from molestation by their lordly seniors, so that no one need stop away on that account. An enjoyable evening is promised. Watch to-morrow's "Daily" for further details.

FRESHMEN RULES.

Any man in the Freshmen class, whether repeating his year or not, who took part in the Freshmen-Sophomore Rush, and identified himself with the Freshmen, must abide by the Freshmen Rules.

A. G. NAIRN,
Chairman of Sub-Committee of Council on Initiation.

SICK STUDENTS.

Students who are confined to their rooms or to the hospital through illness will be given flowers and other attentions by the Ladies Auxiliary of the S.C.A. Anyone knowing of sick students are asked to communicate with Mrs. Willey, Up. 3201.

NOTICE

The next meeting of the Cercle Francais will be in the Union on Monday evening, Oct. 27. All members, and prospective members of the Cercle are asked to attend, as a very interesting programme is in store — including a debate.

ROPE FOR SALE

The Science sophomores offer for sale 35 feet of 1/2 inch manilla rope of the finest quality, only slightly used. Especially recommended for heavy campus and road work. Apply to Sci '27 Initiation committee.

ARTS '27.

All men who desire to contribute to the funds of the Arts Interfacultyp Rugby team, which will be used to purchase football supplies should hand in their contribution (25 cents), at once to the Class Treasurer, A. A. G. Corbet.

DENTAL INTER-FACULTY RUGBY PRACTICE.

There will be a signal practice of the Dental Inter-faculty rugby team at 4.30 to-day. All men are asked to turn out.

MACCABEAN CIRCLE.

The first meeting of the Maccabean Circle will be held Sunday, Oct. 19th, at 3 p.m. sharp, at the Union. Mr. Maxwell Goldstein, K.C., will address the Society, and will take as his subject, "Some Jewish Problems." The annual dance of the Circle will take place Nov. 23rd, at the Venetian Gardens.

ARTS '27.

All Arts Sophomores eligible to attend the Arts Freshman-Sophomore Banquet should hand in their names to the secretary, T. M. Gordon, at once so that the lists may be checked up. This refers to those men who last year paid for two at the banquet, or who paid for one and did not themselves attend.

SWIMMING.

The McGill hours at the K. of C. tank for water polo and swimming are as follows:
Monday, Wednesday and Friday—5.30 p.m. to 6.45 p.m.
General swim Tuesday, 2.30 to 4; Thursday, 5 to 6.

Pool also open Tuesday, 5 to 6.30; Saturday, 2 to 6.

Mr. Mark Verney will be on hand to give swimming instructions on Tuesday from 2.30 to 6.30.

WRESTLING.

Wrestling will start on Monday, Oct. 20th, at Strathcona Hall at 5.15 p.m.

INTERFACULTY RUGBY MAN-AGERS.

Some discarded uniforms have been allotted to the different faculty teams, and may be secured from Major Forbes at the Union. Will the faculty managers please call for their bundle.

CHECK ROOM.

Will those checking clothes at the Union check room kindly wait for their checks before leaving and save confusion afterwards.

BASEBALL THROW.

There will be a practice of the baseball throw to-day at 2 p.m.

Miss Wain will be there to coach. R. DENTON, Manager.

CHEMICAL SOCIETY.

Dr. G. S. Whithy will address the Chemical Society on Friday, October 17th, in the Macdonald Chemistry and Mining Building. His subject will be "Chemistry at the British Empire Exhibition."

This is the first of the usual series of fortnightly lectures given by various speakers before the society during the year. All who are interested are invited to attend.

GYMNASIUM CLASSES.

Gymnasium classes for Science I. and II. will commence on Thursday, October 16th.

Science I, A and B, at 11 a.m.
Science II, C and D, at 10 a.m.

FENCING.

The first fencing practice has been postponed till Tuesday, October 21, owing to renovations to Strathcona Hall.

HARRIERS.

Practices are now held daily at the Stadium at 5 p.m. This is a good way to get your gym. attendance. There is a trip to Kingston for those making the team, which is composed of six men, so all out and try for a place.

MED. SOCCER

The following men are requested to turn out for the game against Arts on the Campus at 4.30 p.m. to-day: G. Davidson E. N. Moore, Evelyn, R. King, Bickle, Greenberg, L. Goddard, J. W. Bickford, J. Boness, K. I. Melville, H. G. Henry, T. Shipman. Substitutes: De Boyle and Parkin.

MED. FOOTBALL PRACTICE.

The following players are requested to turn out for practice this afternoon on the campus at 3.30 o'clock in preparation for the game against Science next Monday: MacLeod, MacLean, Cheeseman, Schwartzman, Hamilton, Roardon, Fullerton, Gomeroy, Walker, Woodruff, Chisholm, Moffatt, Grassick, Angevine, Abep, Milligan, Taylor, Chalmers, Somerville, Peacock and Dell.

MCGILL ROOTERS BOND.

The last practice before Saturday's game will be held to-morrow at five o'clock, in the Music Room. Another baritone player and cornet player are badly needed. Mr. Gagner will be present to conduct the band.

SHINERS AND POLISHERS.

Those who volunteered to help shine and polish up the few Brass Band instruments will meet in the Music Room at 5 o'clock to-night. Brass and cloths have been obtained.

B. W. and F. CLUB.

There will be a meeting of the executive at 5.15 to-night, in the Union to organize the year's activities.

ELECTRICAL CLUB.

The first meeting of the Electrical Club will be held in Room 53, Engineering Building, to-night, at 5.15.

LOST.

A brown leather tobacco pouch on the south course of the Royal Montreal Golf Club at Dixie during the Student-Professor match on Friday last. Finder kindly return to the janitor of the Chemistry and Mining Building.

CHEMICAL SOCIETY

In the Chemical Society notice published in yesterday's Daily the hour of Dr. Whithy's address was omitted. The meeting is at five o'clock in the afternoon of Friday, October 17.

MCGILL WOMEN'S UNION.

The first meeting of the McGill Women's Union will be held in the Strathcona Hall tomorrow at 4.30 p.m. Tea will be served at 4 p.m., at which the members will be the guests of the President, Mrs. R. A. E. Greenshields.

R. V. C. SPORTS PRACTICES.

There will be a practice of the following events to-day at the Stadium: 12.15 p.m.—50 yard dash.
12.15 p.m.—100 yards dash.

Those who have not already attended practices of these events must do so to-day if they wish to compete.

ELECTIONS

Nominations for representatives on the Union House Committee are hereby called for.

These nominations must be in the hands of Mr. Fletcher, secretary of the Students' Council by 6.00 p.m. Monday, October 20th, 1924.

Elections will be held on Wednesday, Oct. 29th, 1924 by each Faculty and the Undergraduate Societies shall be responsible for these Elections.

Nominations must be signed by at least 10 undergraduate members of the Faculty which the nominee is to represent.

TOURNAMENT TAKES PLACE HERE TO-DAY

Four Intercollegiate Tennis Teams to Meet This Morning
KEEN COMPETITION
Queen's, Osgoode Hall and U. of M. Will Battle With Red and White

In the final tennis elimination match, held yesterday L. W. Brown defeated A. C. Abott in two straight sets, 6-3 and 6-2. This gives Brown the sixth position on the intercollegiate team paired with T. M. Brown. He will represent the red and white in second doubles. This combination is rated as being very strong as both of these players were in the finals of the Ontario Provincial Championships, and also in the Ottawa and District Tournament.

The remainder of the team will play as announced in yesterday's Daily. Queen's and Osgoode Hall have not yet sent in their teams. It is definitely known that R. M. C. will not enter a team this year.

JACK WRIGHT,

Who recently defeated his Davis Cup team-mate at one of McGill's most exciting tennis matches, and who is now tennis champion of the University

As the draw is unusually heavy this year the committee is anxious to get off as many matches as possible while the weather is favourable. Play will commence at 10.30 sharp this morning and will continue throughout the day. Dressing accommodation will be provided at Moisson's Hall for all the players.

All the courts will be reserved for tournament play and admission will be by students' tickets.

The courts will be the scene of some stirring battles to-day and spectators will be treated to some of the best tennis played in Canada.

There has been a slight change in the McGill line-up: P. Wickham will take the place of T. Brown, who will only play in the doubles. This change makes Perry No. 3, and Wickham No. 4.

The other line-ups are as follows:

VARSITY
Singles players:
A. Ham
G. Nunns
B. Doherty
C. Worsley

Doubles:
W. J. Lyons and J. J. Lyons
A. Ham and B. Doherty
V. of M.

A. Blon
L. Gellinas
G. Burditt
A. Desaulniers
McGill

Singles:
No. 1.—Jack Wright (Captain)
No. 2.—C. Leslie
No. 3.—S. Perry
No. 4.—P. Wickham

Doubles:
Jack Wright, T. Brown

SOCCER PRACTICE HELD YESTERDAY

Big Turnout in Preparation for Saturday's Game

Yesterday afternoon the soccer players held a practice on the small campus, in preparation for next Saturday's games.

Both the first and the second teams are playing on that day and are up against two strong teams—namely Fairmount A. C. and North Branch Y. M. C. A.

There was an enthusiastic turnout at the practice: enough men were present to form two teams and a short game was played. Although somewhat cramped for space and lacking one pair of goal posts, both teams showed up very well and good combination work on the forward lines was much in evidence.

Besides keeping practically all of last year's players, McGill has been fortunate in that many of the new men turning out are excellent soccer players.

FRENCH CLUB COMMENCES ITS SEASON

Cercle Francais Had Enthusiastic Meeting
TO HAVE DEBATE
Members of Society Gave Short Speeches Last Evening

Last night a very enthusiastic meeting of the Cercle Francais was held in the Union. This, the first meeting of the year, was so well attended that the members had to adjourn from the reading room to the ball room.

The members of the Cercle introduced themselves by a series of short speeches, in which each one stated his status at the university, his name and his intentions after his course at McGill.

Paul Willard was elected assistant treasurer of the society. Leslie Copland, the regular treasurer, is unable to attend the university until rather late in the session on account of a serious illness.

It was decided to have one meeting a week before Christmas, and probably one a fortnight after Christmas. The next meeting will be a week from Monday—that is, October 27—and all succeeding meetings will be on Monday evenings.

Prof. Du Roure, Dr. Villard, Prof. Messac, and Mr. Roche, the members of the French Department, gave each one a short talk. M. le docteur Villard told of the advantages of acquiring French and of the ease with which it may be done simply by application. He mentioned three French societies of the Province of Quebec, which have done much for the preservation and purification of the French tongue in Canada; the conclusion is that the work of the McGill Cercle is not and has not been in vain.

Prof. Du Roure told of the necessity of a knowledge of French for lawyers who are to practice in this province, for engineers who are to supervise labor in this province, and of legislators and other prominent men, who as Canadians, should be perfectly familiar with both languages. He said, moreover, that McGill is peculiarly fitted for the task of teaching French, on account of its high standard, since it is the only English speaking University on this continent where French is spoken in all the French classes. M. Messac, the new French professor, was introduced to the Cercle Francais; and he proved himself very entertaining in his first talk before this organization. Mr. Roche also spoke, being as interesting to his hearers as ever.

At the next meeting, to take place Monday evening Oct. 27, a debate will be held on the following topic: "Resolved that dancing is immoral." (This was suggested by Prof. Messac, who heard the same subject discussed in Glasgow.) Four members were chosen to take part in the debate.

M.S.P.E. FIRST YEAR TENNIS TOURNAMENT

Won by Miss Routh in Two Straight Sets

In the final game for the First Year Tennis Championship, Miss Routh won from Miss Montgomery in two straight sets (6-2) (6-1). At 4 p.m., the game was called with Miss Amaron acting as referee.

Miss Montgomery took first service and lost the game to Miss Routh. This play throughout the first set was of a very high standard both contestants being constantly on the alert, which resulted in long rallies and some very neat backhand strokes. The set ended with the score standing (6-2).

In the second set Miss Routh featured her game with low swift shots which for a time seemed to confuse Miss Montgomery and allowed Miss Routh to win five straight games. Miss Montgomery came back and won the sixth game after it had gone to deuce. The last game of the set went to deuce three times but was finally awarded to Miss Routh making the score (6-1).

The standard of play throughout the whole game was very high. Miss Routh displayed creditable skill in her variety of strokes. Her game was not spectacular from the onlooker's point of view but showed the steadiness which brings results.

By winning the Year 1 Tennis Championship Miss Routh has gained the privilege of playing for the M.S.P.E. Championships against Miss H. Tallow of Year II. This is a game which will be witnessed with intense interest by all M.S.P.E. Students.

Judging by last Saturday's performance, when the "Mounties" were defeated by 2-0, the Red and White aggregation bids fair to make a name for itself in the realm of soccer. This Saturday ought to see two keenly-contested games as all the teams are in fine fettle and out for victory.

NEW ESSAY COMPETITION ANNOUNCED

Prizes Range from Thirty to Sixty Dollars
TWO LANGUAGES

Subject: "How Peace Between Nations May Best Be Secured"

Under requests from the William Gleaves Dayle Memorial, another League of Nations Essay Competition is announced. The subject for the Essays is "How Peace Between Nations May Best Be Secured." To broaden the appeal of the competition either the French or the English language is permitted and many prizes of thirty to sixty dollars are offered. If past competitions of this nature are any index, a large number of competitors may be expected. The actual prize money together with the wide publicity usually given the winning essays are strong inducements to essayists. Any pupil or undergraduate in any recognized educational institution in Canada is eligible for the competition. The rules and prizes are as follows:—

1 (A)—A prize of Thirty Dollars (\$30.00) for the best essay not exceeding 600 words in length, in either English or French, submitted by a pupil under fifteen years of age.

(B)—A prize of Fifty Dollars (\$50.00) for the best essay not exceeding 1000 words in length, in either English or French submitted by a pupil who has attained the age of fifteen and has not attained the age of eighteen years.

(A)—A prize of Sixty Dollars (\$60.00) for the best essay not exceeding 2000 words in length, submitted in English by a pupil or undergraduate eighteen years of age or over.

(D)—A prize of Sixty Dollars (\$60.00) for the best essay not exceeding 2000 words in length, submitted by French by a pupil or undergraduate eighteen years of age or over.

2.—Every essay shall be accompanied by a plain sealed envelope pinned to the essay and containing the name and address of the competitor, and a certificate by the head of a recognized educational institution in Canada stating the competitor's age and that he or she is regularly entered at the institution as a pupil or undergraduate. No name or other means of identification shall appear on the essay itself.

3.—Every essay shall be typewritten and forwarded by registered mail to the General Secretary of the League of Nations Society in Canada at the office of the society, 41 Carleton Chambers, Ottawa, on or before the 11th of November, 1924.

4.—All essays submitted shall become the property of the League of all rights of reproduction shall remain.

5.—The Judges of the competition shall be selected by the governing body of the League, and shall be three in number.

DISCUSSION OF NEW URANIUM ELEMENT

New Radio Active Element Subject of Second Chemistry Colloquium

The second Chemistry colloquium of the season 1924-25 was held last night in the MacDonald Chemistry and Mining Building at 5 p. m. Mr. J. J. Menzies addressed the meeting and the subject discussed was that of an element discovered within the last few years, namely, Uranium "X". He first spoke a few words about the discovery and laboratory methods of producing two other elements, Uranium X and Y. These two elements have a great deal to do with the new element, in fact it is with Uranium "X" that Uranium "Z" is intimately connected. The two men who were greatly concerned with the isolation of this element are the German Chemists Hahn and Meitner. Their discovery was due to the variation and instability of a number of their results while experimenting with the percentages of Uranium "Y" contained in samples of Uranium "X".

This was at first believed to be impurities in the samples, but it was later discovered to be due to a new substance. A few incorrect guesses were made at first as to its origin, and it was later identified with uranium. The particles under observation are so minute that it is very difficult to detect any impurities or alien substances in the sample.

An illustration of this is the fact that the new element is found to be an infinitesimal fraction of the sample of material it comes from. Mr. Menzies dealt in detail of the quantitative separation from uranium and explained its importance in the new type of investigations of the Uranium-Radium Series.

Of its help in advancing the understanding of the radio active elements which will be sidetracked at

HARRIERS TO HAVE BUSY PROGRAMME

Practices on Mountain Will be Held Every Afternoon

The Harriers held the first run of the season last night when about six men covered the short course in very fair time. Manager Brain, who led over the three miles, was well satisfied with the speed shown, and prophesied that the team which McGill will send to the Intercollegiate meet about the beginning of next month will be one of the best. Among the candidates who were traveling well last night were Shann and Moore, while captain Kerr, who has been training for the mile, will likely be out towards the end of the week.

In all, only ten applicants for the team have communicated with the manager, but many of the "Track Team" which leaves for Kingston tonight have signified their intention of appearing on the course regularly, after the commencement of next week. All Freshmen, as well as upper year men interested, are requested to meet either the manager or captain Kerr in the Stadium, any afternoon about five.

The programme of the club is already well filled. Sometime about the beginning of November the Intercollegiate meet will take place at Kingston, and a week before this, the Interfaculty competitions will be held. Middlemarch College has challenged the McGill Harriers to a contest in early November, but no decision has been arrived at yet. On November 22nd, the annual road race of the North Branch Y. M. C. A. for the Dunlop Cup, which is open to teams from Montreal, will most likely see a McGill team at the starting-line.

Coach Van Wagner is optimistic regarding McGill Intercollegiate chances, and believes that a good team can be formed from such as Brain, Kerr, Goforth, Walker, the MacDonald college three-miler, Brodie, the champion of the freshman-sophomore long distance event, Boness, Rubin and Clement, who are the McGill milers in Friday's meet, Elliot, Croll, a Harrier from Varsity, Hard, Airey and Duckworth, half-mile stars, and the many expected newcomers.

TRACK TEAM READY FOR HARD MEET

Men Have Finished Training for Friday

MORE PRACTICES

All Runners Urged to Continue Work for Several Weeks

Although men from McGill, Toronto, Queen's, Royal Military College and perhaps Western University, will compete at the Intercollegiate Track Meet in Kingston tomorrow afternoon, only the "Big Three" are in the race for the Championship trophy. The other two institutions may win prizes but not points toward the title. It is a rule of the Canadian Intercollegiate Track Union that the home club may invite any College or University to send representatives to the competitions held on its grounds, provided that the consent of the remaining members of the Union be obtained. But it is also stated that should a man from a college which has not entered a team numbering at least eight or which does not belong to the Union, gain a place in the event, that man would receive the prize due him, but the second man, if belonging to a full team of an institution in the Union, would be credited with the winner's five points.

In other words, should a runner from Western, say, win the hundred yards dash, he would be given the medal offered to the winner, while the next man from a qualified college to cross the line would add five points to his Alma Mater's total. This means that while athletes from other colleges can and may, secure any award for any event, the points will be distributed among Queen's, Varsity and McGill. It is rumored that at the annual meeting of the Managing Board of the Canadian Intercollegiate Track Union, usually held immediately before the meet, the entry of several more universities will be discussed, but nothing definite about this is known as yet.

A very light practice was all that Coach Van Wagner permitted his team to do yesterday, while today almost nothing but rest will be allowed. Every member of the team is in high spirits and ready to give the stars of the west the battle of their lives. Conflicting reports of the strength of the Ontario contenders are common but Mr. Van Wagner declines the prophesy, merely repeating his statement of last night—"McGill has a good fighting chance." The team will leave the Bonaventure Station tonight, about ten, on a special car, which will be sidetracked at

NOTICES

(Continued from page two)

ARTS '28.
All members of Arts '28 who intend to take part in the Arts, Freshman-Sophomore banquet, are requested to communicate with a member of the class executive within the next few days. The class executive wishes to take this opportunity of urging all members of the class to wear both their caps and ribbons, for if this is not done drastic steps will be taken to enforce the Freshman rules.

ENGLISH RUGBY.

There will be a practice game against the town team tomorrow afternoon. All men are asked to be out at 4.30 sharp.

The backs are especially wanted this afternoon, as they must get going before Saturday. The club will meet at 6.15 for supper at the Union. Various announcements are to be made concerning the coming Intercollegiate games.

The line-up for Saturday's game will be in tomorrow's Daily.

ARTS AND COMMERCE SOCCER.

Arts and Commerce will play against Medicine this afternoon at 4.30 p.m. sharp on the Campus. The following men will compose the team: Easterbrooke, Stephenson, Lloyd, McPhail, Smith, Giovanni Eldridge, Scarfe, Seaton Scott, Kellam, Reserve, Thompson. Colors: Red and White.

R V C ROOTERS

All R. V. C. students are requested to turn out for a short Rooters' practice in the gymnasium tomorrow at one o'clock. This is the only practice before the R.M.C. game, so a large attendance is necessary.

NOTICE.

The following men are asked to turn out for the intermediate water polo game to-night at 8.15 in the Central Y.M.C.A. tank: Parsons, Munro, Moore, Vickers, Williams, McLaren and Adams.

GREEN FIRE LIQUID.

A thorn tree stood in the darkness, And a damp mist rose from the lake And the tears that fell in the water Were all for my lady's sake.

Were all shed for my lady Who sailed on the green firebirds The tears of a wedded lover For his laughing, witch-eyed bride.

Kingston, in order that the men may not be disturbed in the middle of their last rest before the meet.

Men who are not on the team should continue to run every afternoon as the season is by no means over. All who intend to do any work on the track next year are expected at the Stadium each day. Coach Van Wagner explains that the more practice a candidate does this autumn, the better condition he will be in next fall, and advises every runner, irrespective of training or experience, to join the Harriers who are now holding daily work-outs on the mountain.

McGILL GRADS HOLD ANNUAL CONVENTION

(Continued from page one)

The Executive Committee held eight meetings during the past year of which two were special ones. One of these was called for the purpose of considering the Graduates' Endowment Fund plans, the ways and means of raising were outlined and executives appointed.

The second special meeting was held to see what action, if any, the Society should take in regard to a scheme for the construction of a rink and gymnasium on the MacDonald Park property.

The various branches of the Society have been very active during the past year. They have been addressed by different members of the staff, thus helping to keep them in touch with the University and its activities. These addresses constitute one of the best connecting-links between the Graduates and their Alma Mater.

Dr. C. F. Martin, retiring vice-president had addressed enthusiastic meetings in Victoria, Vancouver, Ottawa and New York. Dr. A. S. Eve delivered an address before the Ottawa Valley branch, while Dr. Stephen Leacock attended meetings of the Hamilton and New England branches.

Dr. W. W. Chipman and Dr. H. Oeriel made an extensive tour of the West, during the summer, and held clinics besides delivering lectures.

About thirty-five graduates were present at the meeting with Dr. Alfred T. Bazin, M.D. '24, newly elected president, in the chair.

The Rev. Ernest M. Taylor, Arts '74, attended as representing the Bedford branch of the Graduates' Society, which is the oldest branch, and gave a detailed account of its activities, which are now very flourishing.

The meeting expressed its thanks to Prof. N. N. Evans, chairman of the Committee, for the compilation and publication of the Directory.

Thanks were also tendered to Prof. P. E. Nobbs for the Portrait Panel of Sir William MacDonald and Sir William Peterson, executed and presented by him to the University and now hanging in the ball-room of the McGill Union.

Results of the election of officers held during the Summer were ready and retiring officers were thanked for their services.

She wore a seaweed girdle And glided in her prize It matched the changeling's lustre And witch green of her eyes.

Her hair was a cascade of ripples Found in a golden sea. Her voice was an echo of dreamland And music upon the lea.

'Come to the boat, my husband, And lock up the cottage door. The lake gives a leapin' challenge To dwellers upon the shore.'

The oars fell from the our locks; The boat was dashed with spray In the arms of mermaid daughters My lady silent lay.

Report Of The Principal

the University will be able to give real assistance to those who are patient and persevering enough to pursue the instruction.

The work of the French Summer School, while not carried on under the auspices of the Extension Committee, is one on which too great importance cannot be laid. The school was this year attended by about 135 students, drawn from all parts of Canada and the United States. The Royal Victoria College and the Hostel of the Montreal School of Physical Education, with such other buildings as could be obtained, were converted into French residences, and the students surrounded by a thoroughly French atmosphere. To carry on the necessary work for this school the staff of the Department of Romance Languages is implemented by a number of French teachers, no one but those whose mother tongue is French being selected. The School is doing a most valuable work in promoting not only a knowledge of French but also a knowledge of Canadian conditions, and its continued success is very gratifying.

IV PROSPECTS

It is satisfactory to have been able to record a reasonable amount of progress in the various directions indicated in last year's report.

We have already noted that the Faculty of Medicine has instituted its full-time organization in clinical medicine, and there is now in operation a University clinic. The Faculty of Applied Science is in possession of new premises, and the courses in Electrical, Mechanical and Hydraulic Engineering will all be benefited in consequence. The Faculty of Law has decided on the Civil Law method and we hear of steps being taken by members of the Bar which will enable the Law student to spend a much greater part of his time learning substantive law at the University. If the other buildings of which we are yet in urgent need are not on our immediate programme, there is no cause for despair. A remodelled Arts building, a building for Geology and Mining, and a Gymnasium must be provided, and our experience of past years has given us confidence that the need will be met.

The change in the methods of the Department of Medicine is one which shows very clearly the nature of the development towards which we hope we are moving. The ideal of the University in its professional faculties is to instil a thorough knowledge of the basic principles underlying the subjects taught, to give technical skill only to supplement, and illustrate these principles. Too much emphasis cannot be laid on the order of importance: mere craftsmanship without knowledge is no qualification for a University degree.

There is a growing feeling that the technical training in the Faculty of Applied Science should provide a thorough grounding in essential engineering subjects, combined with increased facilities for purely academic and cultural instruction. Employers of young engineers are more in search of men who have a very thorough knowledge of mathematics, drafting and other similar studies of what might be called a pre-engineering nature, who can write good English and can handle men. This must not, of

course, be taken to mean that the University can afford to neglect more advanced technical instruction, but this instruction must be rather directed toward giving the undergraduate a complete preparation to enter certain branches of the profession than to giving him a general but rather incomplete knowledge of any one branch. Technical laboratories must always be necessary, not only in order to give the undergraduate this preliminary knowledge of what are after all the tools of his trade, but that the University may fulfil another of its important duties, that of research, and it is very largely with this in view that the future extensions of our laboratories will be carried out.

Another question of considerable importance is the adjustment of the course in Applied Science, with a view to giving more time to general cultural instruction, especially in such subjects as Economics and English. It has already been noted that such a change may well involve the addition of a pre-engineering year.

In this connection it seems worth while to mention that admission to higher grades in the University in recognition of higher matriculation examinations or higher school-leaving certificates is not consistent with our general policy, and can never be anything but very exceptional. The object of requiring a student to spend a certain time at an institution of learning, is not to enable him to pass examinations, it is to instil into his mind the culture of the University. Oxford, Cambridge and London are quite willing to accept our Bachelor's degrees as the equivalent of their own, when admission to advanced studies is asked for, but when the matriculant is aiming at a primary degree, they only excuse him one year of residence, as in the case of Oxford and Cambridge, or excuse him the Matriculation examination, as in the case of London. If we require a pre-college year in the Faculty of Applied Science, it will not only be to give the student the opportunity of more learning, but to ensure that he obtains it either here or at least at a college or university, not at a school.

In the Faculty of Arts we hope that the teaching of Government and administrative methods foreshadowed in last year's report will shortly become a reality. There is no doubt that in State service a great and ever-increasing field lies before the University graduate, and that neglect of this field in the past has led to appalling consequences. The present situation is the result of haphazard thought and political expediency. Our civil service was built up as it was required; jobs were made for men of little training, men were found for jobs which no one understood very clearly. A certain number of positions of course, came into existence which called for men of high professional skill, and there is no doubt that the Professional Institute of the Civil Service contains in its ranks many men who are a great credit to the professions to which they belong. As a general rule, however, the conditions of service have always militated against efficiency.

The whole congeries of material, for it cannot even to-day be called a homogeneous whole, was crystallized and fixed by the appointment of a Civil Service Commission, and later

C.O.T.C. ORDERS

McGILL CONTINGENT C.O.T.C. BATTALION ORDERS

BY
LIEUT.-COL. R. R. THOMPSON, M.C.
OFFICER COMMANDING.

The Battalion will parade at the Craig St. Armoury every Thursday night from 8 to 10 p.m., beginning Thursday, October 16th. Dress, service uniform.

Transportation to Craig St. Armoury.

For the information of men living on the outskirts of Montreal, the following tram cars pass the Craig St. Armoury, between 7.30 and 8.30 p.m.—

Amberg, Henry, St. Henri, Deslormier, St. Denis-Ahuntsic and St. Denis-Christophe Colomb.

J. W. JEAKINS,
Major, Adjutant.

"I was so confused I don't know how many times he kissed me."

"What! With the thing going on right under your nose?"—West Point Pointer.

of a firm of efficiency experts, acquainted much more largely with business questions than with governmental problems. As a result the civil servant is part of a more or less soulless machine. He has comparatively little future before him. He may work with the greatest devotion and loyalty, but his work is too often unrecognized. He may lay down a wise policy, or make a valuable suggestion, but a political chief may never understand its importance.

The events of the past few years have shown us very clearly that in our State service we have too few educated and able men, and that the importance to the country of those we have is far underestimated.

ABLE SPEAKERS ON INSURANCE TOPICS

Extension Course Will Commence on Oct. 28th

The extension courses in Life Insurance will commence its 1924-25 activities with a meeting in Room 21 of the Biological building on October 28th. Classes will be held twice each week, Tuesday and Thursdays, at 5.15 p.m. The first term's work will be completed on December 18th, and the second session will extend from Jan. 6th to May 5th.

Following last year's plans, which proved very successful, lectures will be given in various subjects including Mathematics, English, Salesmanship, and Risks.

Professor Herbert Tate, Associate Professor of Mathematics, will take up among others the subjects of Interest and Discount, Assessment and Fraternal Insurance, Annuities, and the Mortality Table. Fourteen lectures in English, and its use in Commercial Activities will be given by Dr. C. J. MacMillan, Professor of English Languages and Literature, G. H. Harris, of the Committee of Commercial studies, whose inspiring efforts contributed very much to the good results of last season will deliver eleven lectures on salesmanship. Mr. J. B. Hahn, F. I. A., F. A. S., will consider the selection of risks.

Seventy-five insurance agents and several university students attended the lectures last year and derived a great deal of information of real practical value in the business life. The varied program included, in addition to the Mathematics and accounting of insurance, addresses on physiology and

ROOTERS' PRACTICE HELD YESTERDAY

"Thundering Thousand"
Prepare for R.M.C.
Game

At 5.15 yesterday afternoon a Rooters' Practice was held at the Union with cheer-leader Alec Olmsted in charge. There was a rather poor, but nevertheless, select turnout at the practice, and it looked as if the "Thundering Thousand" had been reduced to a few "Shouting Hundreds." Several new yells and songs were tried over and all those present showed great enthusiasm. The rooters are working in better unison than heretofore, and by Saturday will be able to give the Team a great deal of support. The McGill-R.M.C. game takes place on that date, and it is expected that a large number of rooters will turn out for this game.

The Rooters' Band is practising steadily and ought to be a great help to the rooters at all big games.

CALIFORNIA U. GLEE CLUB TOURS EUROPE

New York, Oct. 15 (By "The New Student")—Twenty members of the University of California Glee Club spent the summer in touring the United States and Europe giving concerts in the various towns along their route. Royalty and commoners alike came to hear the "exhibitors of the fine art of jazz."

Scotland, England, Norway, Germany, Belgium and France were covered by the Club. After a short vacation in Switzerland the men returned home in time for the fall semester. "And we made money" the report from the West Coast concludes.

The average man is proof enough that a woman can take a joke.—Penn. State Froth.

Big Dope plot frustrated! Cop arrests cold with a bottle of quinine.—Williams Purple Cow.

current economic question and insurance problems encountered day by day were put forth by the members and openly discussed.
